**Ref: International Companies Engaged in Extensive Harvesting and Extinction of the Atlantic Oceanic Natural Resources & A Second Matter.**

Dear Mr. President David A. Granger:

*On Behalf Of:*

### **The Miskitu Government-in-Exile and Miskitu Peoples**

My name is P.W. Ercell Valcina Monica Hendy Clarence Fleurima Tawaska and I am a representative of the Miskitu Monarchy Governance of Central America.

We are contacting you directly for you and your nation's support of our cause and on behalf of our peoples.

Our People have endured the horrors of civil war against the Nicaraguan Sandinista Communists. In the name of Peace, the United Nations requested that in compliance with a peace accord with the communists and traitorous, corrupted so-called Miskitu freedom fighter against the royal families, the traditional authorities and the elders opposition, disarmed our People which was the greatest mistake that led to our present-day situation of our Miskitu Peoples being defenseless against the atrocities being imposed upon our women, children and men in today's world.

We are aware that Guyana seeks to harvest your natural resources such as your offshore oil, for the benefit of your entire nation. We, in the autonomous Miskitu territories consider similar developments for harvesting our natural resources that would also protect our bio-diversity with the creation of “green corridors” and safe processing of all minerals such as gold and silver as not to poison our waters and farmlands as common sense to sustain today’s wealth for our future generations.

Our Miskitu nation supports and advocates free markets and the balance of advancement, tradition, technology, and development as well as for the increase of our agri-business sectors for not only self-sustaining but exportation of our excess agricultural products, in our territories.

Our people can and will benefit from a portion of the profits from sponsoring these kinds of concessions to support medical facilities, education, tourism, infrastructure, training, food programs, and helping our people with their farmlands.

Our Peoples historically in a similar manner as Guyana had an association with Great Britain. We are comprised of 12 different ethnic groups, yet are also diverse multi-ethnic groups due to intermarriages over the last few centuries.

Mr. President Granger, we need your nation’s peaceful intervention on behalf of our Miskitu Peoples before the United Nations to stop the terrible harm and suffering caused by the Nicaraguan Sandinista transgressions against our peoples, less we pursue international help to secure arms for a military confrontation with the communist government to throw off the chains of communist enslavement. We need a voice before the United Nations to stop the poisoning of our rivers that’s polluting our drinking water and Atlantic Caribbean fisheries. We need a voice to stop the forced labor of our men and divers solely for the benefit of the Sandinista Communists. We need a voice to stop our people from being forcibly removed from their farms and businesses while communist Sandinista Party members take over our homes and fields as their own. We need a voice to stop the extrajudicial killings and enslavement of our men, as well as stopping the rape and torture of our women and girls.

### **Pollution**

With respect to fisheries, we must explore another issue that affects our drinking water and oceanic fisheries and that mining “run-off” of toxic waste from the mining sites, carrying toxic waste into our rivers and out into the oceans that are causing huge “voids” of no life whatsoever. Life in these areas has literally become extinct upsetting the food chain of our fisheries starting with bottom fish, crabs, lobsters, and clams that is now claiming the lives of surface fisheries, sharks and dolphins that in turn contaminate and harm our own people eating toxic seafood.

All waterways connect! This is a worldwide problem that is not only affecting our coast but all coastlines around the world. We need help to eliminate toxic runoff that creates drinking water that poisons our people as well as contaminates our food from the ocean.

## Forced Working Conditions

The Miskitu divers are forced and compelled to fish without proper diving equipment, poor sanitary and safety onboard the vessels, no medical treatment or adequate compensation for themselves or families for injuries and disabilities sustained. International companies are not only engaged in extensive harvesting of the Indigenous oceanic natural resources but condemning the Miskitu people into suffering and poverty without sharing the financial gains from business ventures.

In effect, our divers and fishermen are being forced to ravish and raking the natural resources of the sea so excessively that the region is becoming barren and devoid of harvestable fisheries and other sea life such as lobsters for the local indigenous consumption and sustainability of the oceanic natural resources that constitute our Miskitu fisheries.

Guyana as a nation, is similar to the Miskitu Coast because of our coastlines with the ocean seas, where our local divers and fishermen most likely have very similar problems which gives your government understanding of what I am about to say on this matter here where we are seeking your nation's help to remedy the severe trauma and effects on our people.

The issue is a mutual Atlantic Ocean issue that also encompasses both pollution as well as the horrible working conditions that may be affecting your fishermen and divers as it is our Miskitu divers and fishermen who are subjected to international abuses as a result of illegal concessions provided by the government of Nicaragua that are given to international businesses to harvest our resources without affording the Miskitu people any benefits or medical treatment.

For your review we have attached a signed testimonial from our Miskitu divers and citizens as a petition for your intervention on our behalf, as well as a video and our recent United Nations Human Rights Complaint that has additional testimonials and complaints regarding our divers and fishermen.

## Crimes against Humanity

Throughout history, time and time again, racism and bigotry surface against us as well as our brothers and sisters around the world. Grecians under the Ottoman Empire suffered the very atrocities that we now suffer under the Sandinista regime and as a step forward towards our own evolution from the darkness of this chaotic world where 65% of the world suffers to leaving a legacy of hope and opportunities for success for all! We as the most intelligent species on the planet with unlimited potential, we pray that you support our cause.

The practices of the Spanish, regardless of which government is in power continues on the quest to engage in forcing our people into bondage, forced relocations with no

place to go, farms and homes seized, forced labor, our girls and women raped and our men are murdered. We need your help in the United Nations to end these atrocities and if need be, require the Republic of Nicaragua to negotiate with, participate in and be given benefits for our people from the harvests of our natural resources, gold, oil, forestry, fisheries, and waters as their historical hereditary, traditional authorities who are in fact the legitimate royal governance representatives of the Miskitu Peoples.

We too, want to eradicate illiteracy poverty, gender inequality, violence against women and children. We do so by putting our money where our mouth is and use our own money to do for our people with any support from anyone! Many people throughout the world are unaware that black humans were part of Central America long before Columbus. The ancient Mayan pictorials confuse the western world when they see that our heritage is memorialized in their art. With misconceptions of how we arrived in the Americas, they have doomed our heritage and human rights with racist actions in order to doom us as part of the Central American human race into extinction. Even Columbus wrote of seeing “black indigenous people on the shores of Central America who wore large golden medallions”. We were there and we established the Miskitu Kingdom and royal lineage of our traditional royal family as the legitimate Monarchy governance of our regions long before Columbus arrived.

Our people, in good faith, gave up their arms for peace and now our people are further being massacred by a century's tradition of greed and bigotries. Many nations of the world are under the false premise that the Miskitu are tribes of savages or just farmers and that “black indigenous people” did not exist in the New World before Columbus. The shocking truth is that we did exist and existed as a nation of people that Christopher memorialized and documented. Originally, we were an industrious nation before and after Columbus, up until about a century ago after the Friendship treaty, with England and other treaties first recognized us then later, refused to recognize us as a sovereign nation where today's reckless corporate manipulation has left the Miskitu Coast in a chaotic state. The nation of Guyana is a critical voice in the United Nations and we need your voice as well as support.

For your review, we have also attached our complaint with exhibits to the United Nations Human Rights Commission. We need your nation's support to end the horrific crimes against the Miskitu Peoples of the Caribbean Atlantic Coast.

No one helps and as the world of nations promotes all end of poverty, the furtherance of global education, infrastructure, human rights, ending hunger, with a world vision of the inclusion of all mankind, our people of the Miskitu nation are continually being left out.

We are good people who trust in God and feel no matter how we are being killed out, we do not die in vain and that there is hope. We are stewards of the Earth which is why so much produce, precious minerals. Livestock, sea life thrives in our home. Rather than kill us and take advantage of us, the world should learn from us how to care for our planet because it is in a desperate state as well as work with us in business.

We believe that we can count on God moving the hearts of the United Nations to help us alleviate ours and so many others suffering. We need your support to act on our behalf including intervening on behalf of our fishermen and divers as one seafaring nation in support of another. For a long time, the victim's identity has been branded on many nations while the home governments do nothing to bring their citizens out of strife. This degrades their positions as leaders causing riots and upheavals that we now see worldwide!

Page | 5

So if our countries are poor and suffering; is that truly the reflection of how we feel about ourselves? Many governments shamelessly continue this custom, never evolving past the master and slave stages. Do you think it is time to break the cycle and unite as the human race? Most of the sufferings on the planet are man-made! And anything man-made can be unmade. What God has given us, only the Creator can change the Earth herself, who is a patient Mother always giving and nurturing life that abounds her,

Mother Earth also has great power, where she can unleash great natural disasters like tsunamis and no nuclear bomb nor weapon can defend us against such wrath! She takes her time healing too, take an example like Chernobyl the rest of the ecosystem can accommodate and mutate, and withstand our abuses, mistakes and destruction however superior our intellect to other species our bodies are feeble without each living organism doing its part in our ecosystem remaining at a healthy level, illness will continue to rise then we will perish, if we don't take care of our home. I do believe that is what our indigenous ancestors and our brothers and sisters who still hold to their teachings regarding the Earth are telling us!

Our modern developed world is like an adolescent child; a juvenile, thinking we know it all and our parents know nothing, but even in science it always reverts or is rooted back to the old! Wealth is being able to provide for all and having a surplus to loan or provide gifts but, there is even a deeper wealth of being able to provide citizens with undeniable human rights!

Yours is the Earth and everything in it, President David Granger yet, the same goes for me, them, her, him and theirs as we are all children of this wonderful planet. Since we all have that same right to our beautiful planet named Earth, we cannot deny, nor criminally and inhumanely take what is not ours; What God has given to someone else to have and call it ours as we destroy people's lives, creating unnecessary poverty, then excuse it, as this is the way man has done things for centuries because nothing done in the past can apply to us in the present.

We know better, we are better informed and we cannot claim ignorance any longer! Leaders lead, they do not follow, what's popular, nor cower on what someone might say or rumors or gossip! They lead, the best leaders, throughout history, whose humanity still stands the test of time, know "There are three motives for which we live; we live for the body, we live for the mind, and we live for the soul. Not one of these is better or holier than the other; all are alike desirable, and not one of the three; body, mind, or soul—can live fully if either of the others are cut short of full life and expression."

There are better ways for us as a species of intelligent beings can cohabit in this world. Don't let the suffering of our planet overwhelm you, but let's seek a solution and start somewhere, meaning our Miskitu nation and use it as a model (I have a plan that needs help); let's move forward from here, because now is what we have the past can only be the past when it no longer affects the present then we use it for reference, the now is for the future and if we don't think and act on what we can do with now the future does not exist!

We humbly ask that you and your nation sustain our sufferings and bring forth our causes before the United Nations for remedy. Our door is open to you or your representatives to discuss our peoples' plight and remedies available before the nations of the world. Feel free to contact me or one of our representatives at your convenience.

Respectfully submitted, as seen to, this 18<sup>th</sup>, day of November 2019.

Dear Princess,

**Request for intervention**

I acknowledge receipt of your letter dated 2019.11.18. You requested the Government and peoples of the Co-operative Republic of Guyana to intervene at the United Nations to stop the alleged suffering caused by the Nicaraguan Sandinista.

You claim that you need a voice to bring an end to:

- poisoning of rivers that pollute drinking water and fish;
- forced labour of men and divers;
- forced removal of persons from their farms and businesses;
- extrajudicial killings and enslavement of men; and
- rape and torture of women and girls.

I have forwarded your letter and enclosures to the Minister of Foreign Affairs for her attention. The Minister will respond to you.

Yours sincerely,

David Granger  
President of the Co-operative Republic of Guyana
